Business Analytics Science - Temple University

Professional Experience

Special Projects:

- **Skribble** - Collaborated on the front-end team to develop an app encouraging children to journal their emotions regularly. Designed UI components for mobile apps and web.
- **Mindful Media** - Led a team of three in designing a social media app promoting healthy habits via diet and exercise. Applied full UX design processes: ideation, user personas, wireframing, prototyping, and testing.
- **SkillShareHub** - Led a team of three to design and implement a relational database system. Created an ER diagram with 5+ entities and 4+ binary relationships using SQL Developer, including a many-to-many relationships between students and courses.
- **Land of Adventures** - Developed a website supporting user sign-up/login and data input for travel destinations, activities, ratings, costs, visit dates, and images. Managed backend database with MySQL, ensuring data integrity and accessibility.
- **Explore More** - A travel and culture platform showcasing destinations, local experiences, and culinary highlights to inspire exploration and cultural connection. Provides practical tips and insights for planning memorable adventures.
- **Cosmic Highlight** - Built a space-themed website using WordPress, customizing the layout, design, and content structure to showcase unique space missions and discoveries. Focused on clean visuals, organized categories, and user-friendly navigation.
- **Unleashed Media** - Redesigned and modernized a website using HTML, CSS, and JavaScript on CodePen, enhancing usability, responsiveness, and overall user experience.
